CONTENTS OF VOL. XXV (Nos. 1-6)

NUMBER 1—JANUARY

	Page
A comment on three papers. H. H. ROSENBROCK	1
On strict system equivalence and similarity. P. A. FUHRMANN	5
The transformation of strict system equivalence. H. H. ROSENBROCK	11
Notes on strict system equivalence. L. PERNEBO	21
Performances of the method of linear systems identification by Mellin deconvolution. R. PROST and R. GOUTTE	39
Remarks on 'Design of a zero-sensitive observer'. T. MITA	53
Design of general model-following control systems. U. SHAKED	57
The generalized Nyquist stability criterion and multivariable root loci. A. G. J. MACFARLANE and I. POSTLETHWAITE	81
Optimal control problems with non-differentiable isoperimetric constraints. D. P. SUDHAKAR and E. D. EYMAN	129
Modal design of continuous-time tracking systems. T. R. CROSSLEY	153

NUMBER 2—FEBRUARY

Continuous state models for finite state machines. W. A. PORTER ...	165
Large-scale finite state machines. W. A. PORTER and A. S. ZALECKA-MELAMED	185
Inverses and adjoints of finite state machines. W. A. PORTER	201
The admissibility of desired transfer-function matrices. U. SHAKED ...	213
State feedback and inverse system. K. FURUTA and S. KAMIYAMA	229
Gram-Schmidt algorithms for covariance propagation. C. L. THORNTON and G. J. BIERMAN	243

	Page
Optimal control of linear continuous systems with multiple control constraints. A. FUJIMOTO and Y. UNO	261
A parameter imbedding solution of algebraic matrix Riccati equation. M. JAMSHIDI and F. BÖTTIGER	271
The probability density and level-crossings of first-order non-linear systems driven by the random telegraph signal. R. F. PAWULA	283
Proportional-plus-multiple derivative output feedback. A new multi-variable controller for pole placement. M. TAROKH and H. SERAJI	293
On explicit solution, stability, and reduction of a class of linear time-varying discrete-time systems. M. Y. WU and A. SHERIF	303
Reduced-order observers for multivariable systems with inaccessible disturbance inputs. V. GOURISHANKAR, P. KUDVA and K. RAMAR	311
Correspondence:	
Comments on the paper "A general frequency stability criterion for multi-input-output, lumped and distributed-parameter feedback systems". H. H. ROSENBROCK and P. A. COOK	321
Comments on the paper "A general frequency stability criterion for multi-input-output lumped and distributed-parameter feedback systems". C. A. DESOER	323
Book review	327

NUMBER 3—MARCH

On-line modified least-squares parameter estimation of linear discrete dynamic systems. S. SAGARA and K. WADA	329
On pointwise degeneracy, controllability and minimal time control of linear dynamical systems with delays. A. THOWSEN	345
Suboptimal control of minimum-time linear discrete systems. M. E. RASMY and M. H. HAMZA	361
Graphical stability analysis of non-linear multivariable control systems. S. SHANKAR and D. P. ATHERTON	375
Inverse systems. H. H. ROSENBROCK and A. J. J. VAN DER WEIDEN	389
Inversion of rational matrices. A. J. J. VAN DER WEIDEN	393
Integral invertibility of linear time-invariant systems. S. KAMIYAMA and K. FURUTA	403

	Page
Stability analysis of complex discrete systems with locally and globally stable subsystems. G. BITSORIS and C. BURGAT	413
The identification and adaptive prediction of urban sewer flows. M. B. BECK	425
Identification of noisy distributed parameter systems using stochastic approximation. C. S. KUBRUSLY and R. F. CURTAIN	441
A recursive approach to time-series analysis for multi-variable systems. P. YOUNG and P. WHITEHEAD	457
Eigenvalue assignment in linear multivariable systems by output feedback. B. PORTER	483
Correspondence:	
Comments on 'New results in feedback modal-controller design'. P. MURDOCH	491
Erratum	492

NUMBER 4—APRIL

Sequential synthesis of modal control policies for multi-input continuous-time systems. T. R. CROSSLEY and B. PORTER	493
Converse theorems for stochastic exponential stability. P. KLOEDEN and P. DIAMOND	507
Design of optimal constrained dynamic compensators for non-stationary linear stochastic systems. H. R. SIRISENA and S. S. CHOI	513
Multilevel control and optimization using generalized gradients technique. M. S. MAHMOUD, W. G. VOGT and M. H. MICKLE	525
On the structure of optimal control for certain systems linear in control. S. ARIMOTO and M. Y. GAUFAR	545
Error bounds for approximate analysis of self-oscillations in autonomous relay control systems. F. F. JUDD	557
A simplified frequency-response design approach for power-station control. F. M. HUGHES	575
An optimal control problem with control component failure. E. D. EYMAN	589
The intersection of the root-loci of multivariable systems with the imaginary axis. U. SHAKED	603

	Page
Frequency-domain design of feedback systems for specified insensitivity of time-domain response to parameter variation. K. R. KRISHNAN and A. CRUICKSHANKS	609
Computation of reachable and observable realizations of spatial filters. E. FORNASINI and G. MARCHESINI	621
Discrete system identification and iterative solutions of linear systems. C. P. NEUMAN	637
Stochastic differential equations and their application to randomly time-varying control systems. L. H. SIBUL and C. COMSTOCK	647

NUMBER 5—MAY

Multivariable Nyquist theory. R. A. DeCARLO, J. MURRAY and R. SAEKS	657
The asymptotic behaviour, the angles of departure, and the angles of approach, of the characteristic frequency loci. I. POSTLETHWAITE	677
Preservation of controllability in linear time-invariant perturbed systems. J. H. CHOW	697
The decentralized profit maximization of interconnected production systems. Part I. The theory of price coordination. M. D. SIMMONS and G. W. T. WHITE	705
The decentralized profit maximization of interconnected production systems. Part II. Price coordination and buffer storage. M. D. SIMMONS and G. W. T. WHITE	721
An algorithm for solving the matrix equation $X = FXF^T + S$. G. KITAGAWA	745
Minimal-order compensators for decoupling and arbitrary pole placement in linear multivariable systems. H. R. SIRISENA and S. S. CHOI	755
Optimal output feedback control with reduced performance index sensitivity. T. YAHAGI	769
Generalized minimal realization of transfer-function matrices. U. SHAKED and M. DIXON	785
Simplification and extension of the Falb-Wolovich decoupling theory. H. M. POWER	805
Correspondence:	
Comments on 'Asymptotic behaviour of root-loci of linear multivariable systems'. D. H. OWENS	819

NUMBER 6—JUNE

Page

New filtering and smoothing algorithms for discrete non-linear delayed system with coloured noise. D. F. LIANG and G. S. CHRISTENSEN	821
Optimal control of an economic system modelled on the basis of cyclical growth theory. N. U. AHMED, G. J. JUTRAS and S. H. YEO	827
A design technique for linear multivariable feedback systems. A. G. J. MACFARLANE and B. KOUVARITAKIS	837
On the controllability of linear systems with delays in the control. J. KLAMKA	875
On maximal unobservable subspace, zeros and their applications. T. MITA	885
Optimal control of linear systems with several cost functionals through a multicriteria simplex method. M. SAKAWA, R. NARUTAKI and T. SUWA	901
Arbitrary pole placement using linear output feedback compensation. P. J. ANTSAKLIS and W. A. WOLOVICH	915
Decomposition-aggregation of large-scale power systems and stability studies. M. DARWISH and J. FANTIN	927
Determination of a transfer function from amplitude frequency response data. M. T. JONG and K. S. SHANMUGAM	941
The analysis of relay control systems with coloured noise inputs. K. AKIZUKI and F. TADA	949
Design algorithms for a sensitivity constrained suboptimal regulator. P. J. FLEMING and M. M. NEWMANN	965
Truncation of the mixed Cauer form. The best approximation in a definite mathematical sense. M. J. GOLDMAN and C. T. LEONDES	979
Correspondence :	
Note on 'Generalized root locus assignment of all the poles of a multi-variable system by output feedback'. A. I. VARDULAKIS	983
Subject index	985
Author index	989
